

Convention: SC	Lindane: Capacity building and scientific activities
LEGAL BASIS/MANDATE:	
<ul style="list-style-type: none"> • Activity 17 of the Programme of Work 2014-2015 as adopted by decision SC-6/30 • Activity 16 of the Programme of Work 2014-2015 as adopted by decision SC-6/30 • Activity 22 (SC) Scientific support to Parties of the Stockholm Convention • Related COP decision: SC-6/2: Exemptions 	
BACKGROUND INFORMATION:	
<p>By decision SC 4/15 the Conference of the Parties to the Stockholm Convention (COP) listed lindane under Annex A of the Convention and requested for the Secretariat to cooperate with the World Health Organization(WHO) in developing reporting and reviewing requirements for the use of lindane as a human health pharmaceutical for the control of head lice and scabies, taking into consideration the concluding statement in the Persistent Organic Pollutants Review Committee's risk management evaluation on lindane. Accordingly activities were undertaken¹ including a study of health sector information sources and WHO databases. The results revealed that lindane is still marketed in countries as a pharmaceutical for head lice and scabies. Furthermore, of the 99 national essential medicines lists examined, 24 list lindane as essential medicine for the treatment of head lice and scabies².</p> <p>By the decision SC-6/2 the COP requested the Secretariat, to continue to take the lead in implementing the activities on reporting and reviewing requirements for the use of lindane as a human health pharmaceutical, and to report to the Conference of the Parties at its seventh meeting on the progress of those activities. Based on the information gathered through the above activities, a draft framework for reporting and reviewing of lindane needs to be developed and undertake an initial assessment of information through an expert consultation for consideration by the Conference of the Parties at its seventh meeting. The outcomes of expert consultation will be the basis for the development of training material to enhance capacity for parties to regulate lindane and to introduce alternatives.</p> <p>The activities for which funding is sought in this proposal focus on assisting and supporting parties who still rely on lindane so that they are capable to manage and eventually phase out lindane before the exemption expires. A series of webinars to enable parties to share information and experiences on introducing alternatives to lindane and facilitate the reviewing of the continued need for lindane were undertaken.</p>	
PROPOSED ACTIVITIES TO BE FUNDED:	
<ol style="list-style-type: none"> 1. Engagement of a consultant to prepare: <ol style="list-style-type: none"> a. A preliminary report on a review of information related to accessibility to lindane and its alternatives and; b. A draft framework for the assessment of lindane. 2. A meeting of an expert panel aim at establishing requirements for the assessment of continued need for lindane and to facilitate introducing alternatives; and to prepare a report to the COP on an assessment of information on lindane and its alternatives for its consideration for continued need for lindane. 3. National training workshops on industrial chemicals (2 workshops: 15 participants, 2 days) to provide countries that are still relying 	
RESULTS TO BE ACHIEVED:	
<ul style="list-style-type: none"> • A framework including requirements for reporting and reviewing of lindane as a pharmaceutical prepared. • A report on an assessment of information on lindane and its alternatives as a pharmaceutical for the consideration of the COP at its seventh meeting is presented. • Information to facilitate Parties on the evaluation and introduction of alternatives to lindane is available. • Parties capacity to manage and phase out lindane is increased.
